please do not report the images to the
Problem Image Mailbox.**

ABSTRACT OF THE DISCLOSURE

A CRUSHER MACHINE

A crusher (10) having a chassis (11) on which a crushing chamber (23) is mounted and having an upper loading opening (26) to receive crushable material and a lower discharge opening (27) through which gravity discharge of crushed material can take place. In the event of material becoming jammed in the crushing chamber (23), an unjamming vehicle (15) having rock breaker attachment (17, 18) is operated, which is clamped to a vehicle support platform (13) mounted on the chassis (11) and which is located near to the crushing chamber (23) so that the rock breaker attachment (17, 18) can reach into the chamber (23) to engage with and to break-up the jammed material.
